

Modern, cloud-first, any-to-any data integration platform
that scales with the business

Data Integration Challenges (And How We Solve Them)

Volume of data grows exponentially

- Our app offers petabyte-scale data processing capabilities
- It is vertically and horizontally scalable
- We offer a high-performance solution with high availability (HA) features
- Our app supports a variety of data integration techniques, enabling you to choose the best solution for your specific use cases

Variety of data and organizational silos

- The app includes hundreds of connectors for SQL and NoSQL databases, cloud data warehouses, APIs, SaaS apps, data storage systems and message queues
- It supports any format and any data structure, along with industry-standard protocols, ensuring seamless access to your data, regardless of its format or location
- Built-in multitenancy enables multiple teams to work independently on diverse data projects simultaneously

Long implementation circle

- The app supports complex no-code transformations and drag-and-drop mapping, as well as code-based transformations using JavaScript, Python, SQL and XSL
- It features automation and advanced monitoring capabilities through an open API
- Etlworks offers best in class support and training
- You can outsource development to Etlworks or our trusted partners

Security and regulations

- We compliant with SOC 2, SOC 3, HIPAA, GDPR, and DPA regulations
- Our app provides seamless SAML integration with any identity provider
- We implement strict data encryption and data loss prevention measures
- Our app and infrastructure maintain the highest standards of network and application security
- We provide an enterprise-grade solution featuring role-based security, multitenancy, single sign-on (SSO), multi-factor authentication (MFA), and personalization

Product

**Cloud-Native.
Can be Installed
On-Premise**

**Intuitive
Web UI**

**250+ Connectors
50+ Transformations**

**Any to Any
ETL and ELT**

**Cloud Data
Warehouses**

**EDI
Processing**

**Real-Time
Streaming**

**Change
Data Capture**

**ESB, User-defined
APIs, Webhooks**

**Can Connect to
Any Third-Party API**

☆ CAPABILITIES

Data Integration for Everyone

Etlworks solves fundamental data integration problems

 [MORE ABOUT PRODUCT](#)

Capabilities

- Low code / no code
- Real-time data integration
- Log-based Change Data Capture (CDC)
- ETL, ELT, Reverse ETL
- EDI processing
- API data integration
- Event-based data integration

Development Tools

- Built-in version control
- JavaScript/Python/SQL
- Export/Import, Patch
- Multi-tenancy
- Built-in and user-defined templates
- Macro library
- Global search

Connectors

- 250+ connectors
- 129 SaaS apps
- 177 data warehouses, relational and NoSQL DBs
- 20 file and cloud storage systems, email systems and data lakes
- 7 Message queues
- Any REST/SOAP/GraphQL API
- 18 data exchange and EDI formats

Deployment

- Any cloud, any cloud region
- Hybrid cloud with integration agents deployed behind firewall
- On-premise
- Any Linux, Windows Server/10/11, MacOS (via Docker)
- Docker
- Single node and multi-node cluster
- High availability and autoscaling

Any to Any ETL, ELT, Reverse ETL, Real-time streaming

Transformations

- Source-to-destination
- Per field mapping
- Code (JavaScript, Python),XSL
- SQL
- Deduplication
- Filter
- Sort
- Validation
- JOIN
- UNION
- INTERSECT
- MINUS
- Pivot
- Transpose
- Extract nested dimensions
- Normalize as key-values
- De-normalize key-values
- XSLT
- Split and Merge files
- Partition
- File operations
- EDI processing
- Normalize nested dataset as relational tables

 **TRANSFORMATION AND MAPPING**

Log Based Change Data Capture

(CDC)

 MORE ABOUT CDC

Sources

MySQL

CDC

Oracle

CDC

IBM DB2

CDC

Microsoft SQL Server

CDC

PostgreSQL

CDC

MongoDB

CDC

IBM AS400

CDC

Real-time CDC Streaming

Advantages of CDC

- Low latency
- Real-time
- Low Impact on Source
- INSERT and MERGE

Destinations

Data warehouses and Databases

Amazon Redshift

Snowflake

Azure Synapse

Vertica

Databricks

Greenplum

ClickHouse

Any relational databases with JDBC driver

File storage systems

Amazon S3

Azure Storage

Google Cloud Storage

File system

Message queues

Apache Kafka

Google Pub/Sub

Azure Event Hubs

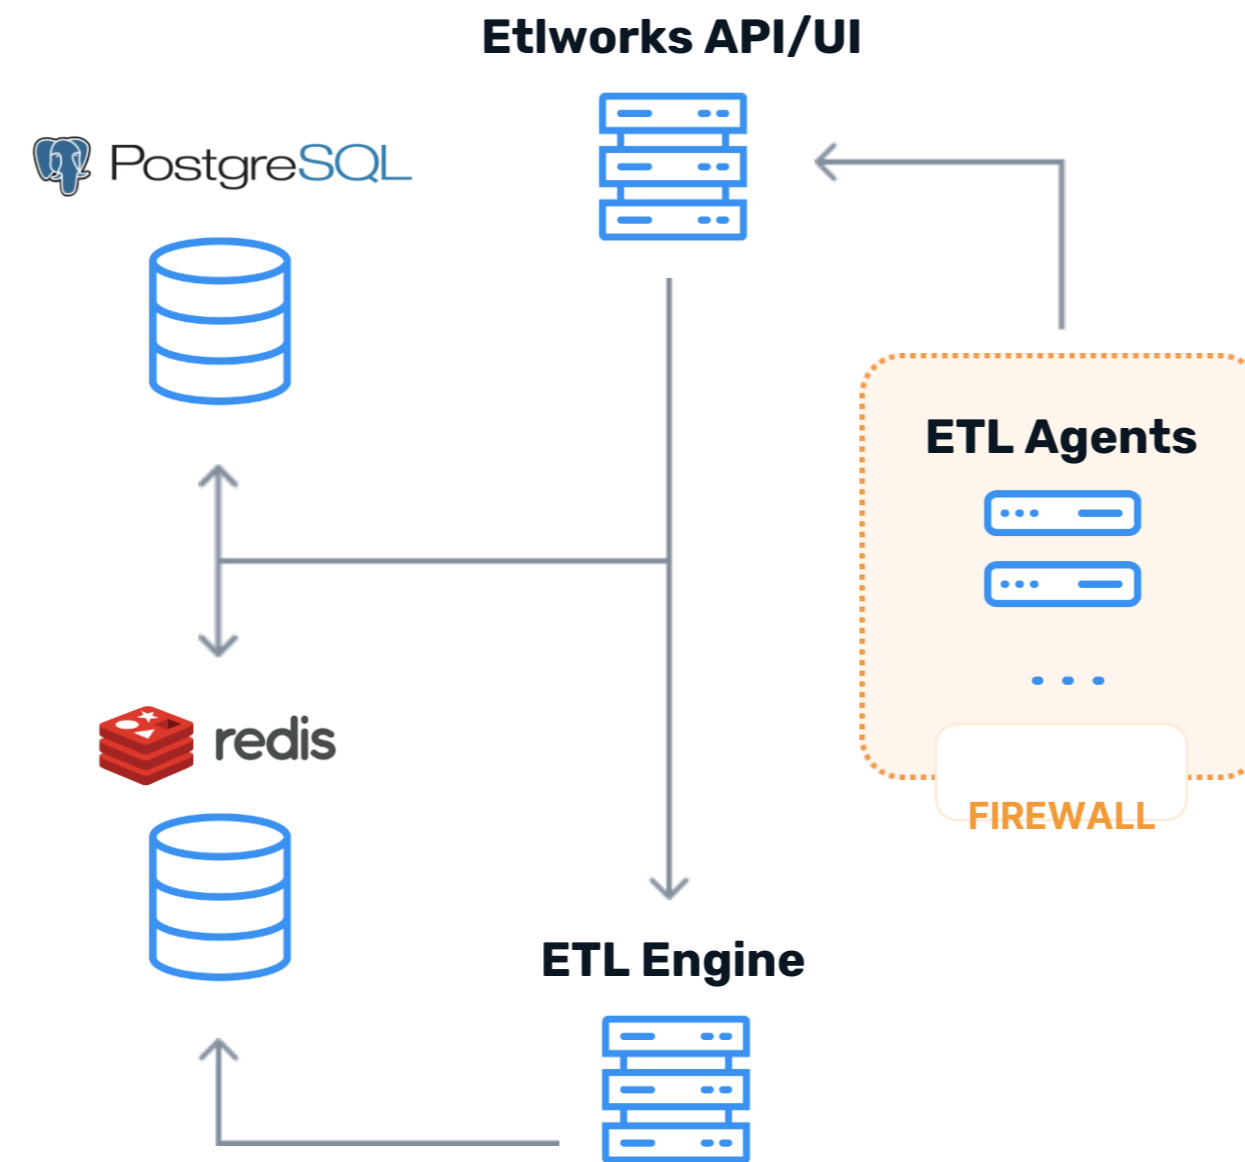

Deployment and Scaling

Deployment options

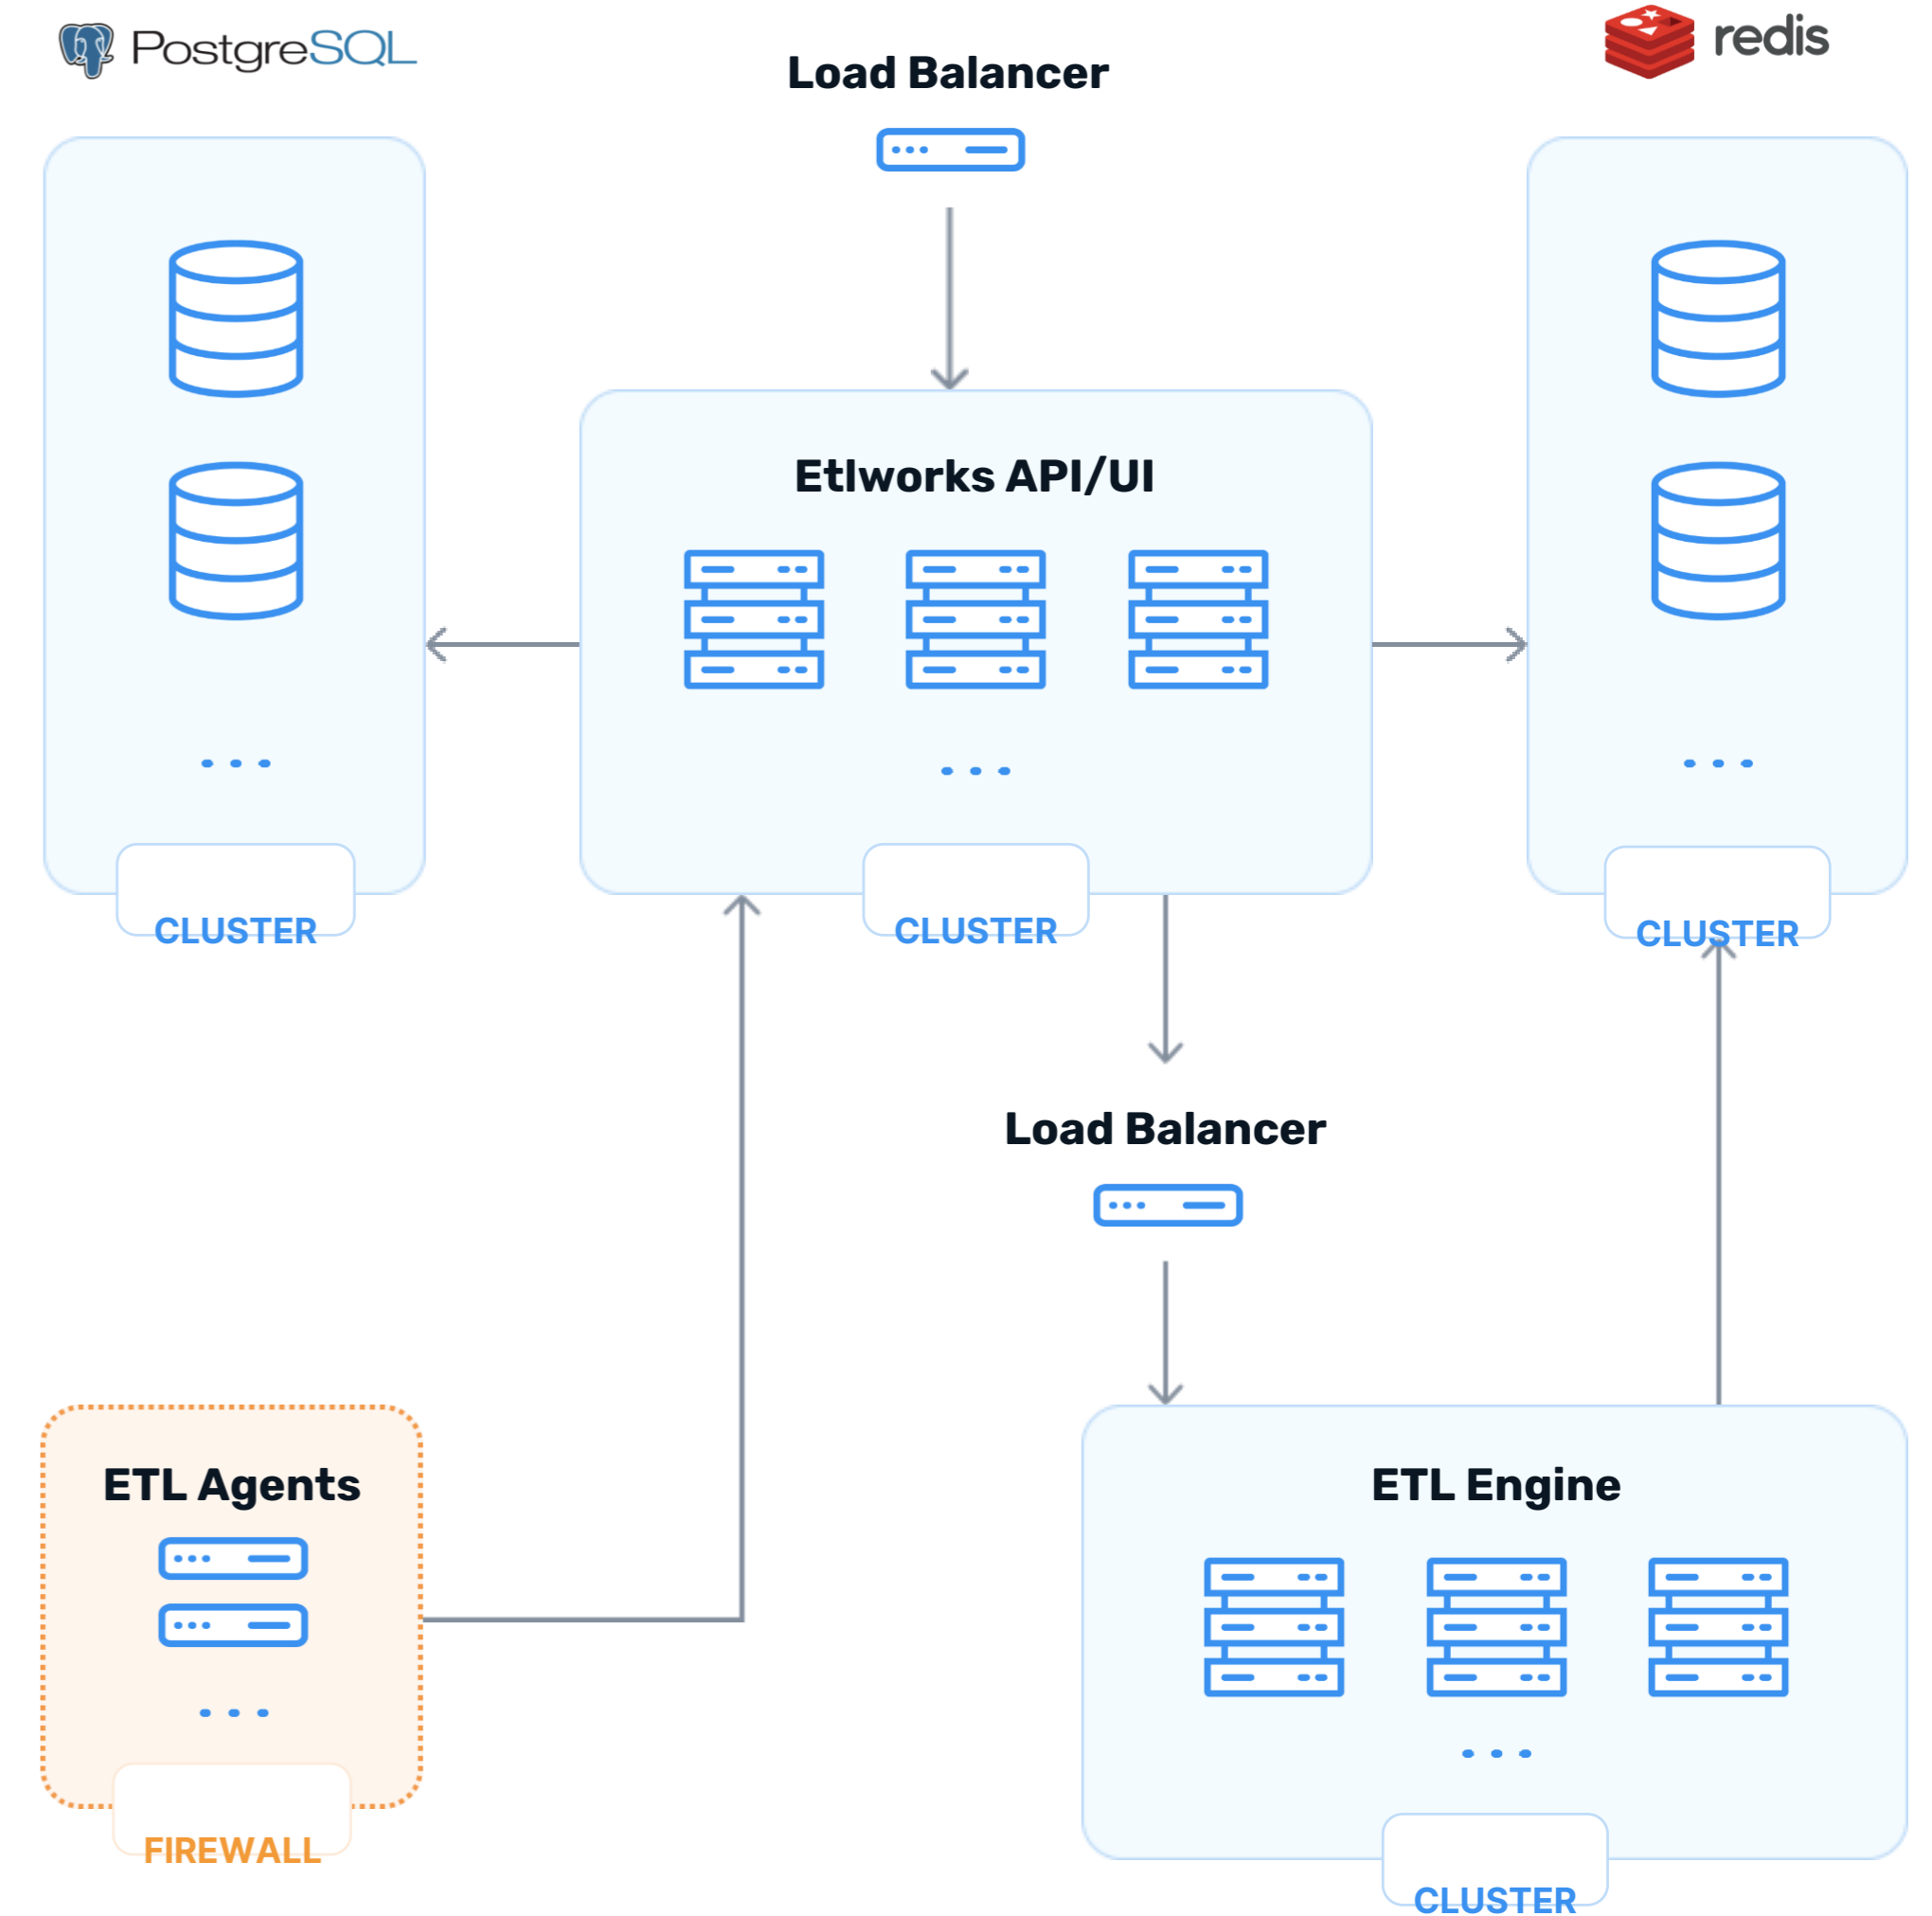

- Single node and multi-node cluster
- Shared instances – AWS us-east1, eu-east-1
- Dedicated instances - any cloud and cloud region managed by Etlworks
- Any cloud managed by customer
- On-premise
- Hybrid cloud with Integration Agents
- Supported operating systems: Amazon Linux, Ubuntu, CentOS, Red Hat, Windows Server/10/11, Docker

[MORE ABOUT DEPLOYMENT](#)

Single-Node

Multi-Node

Supported Topologies

Cloud-agnostic

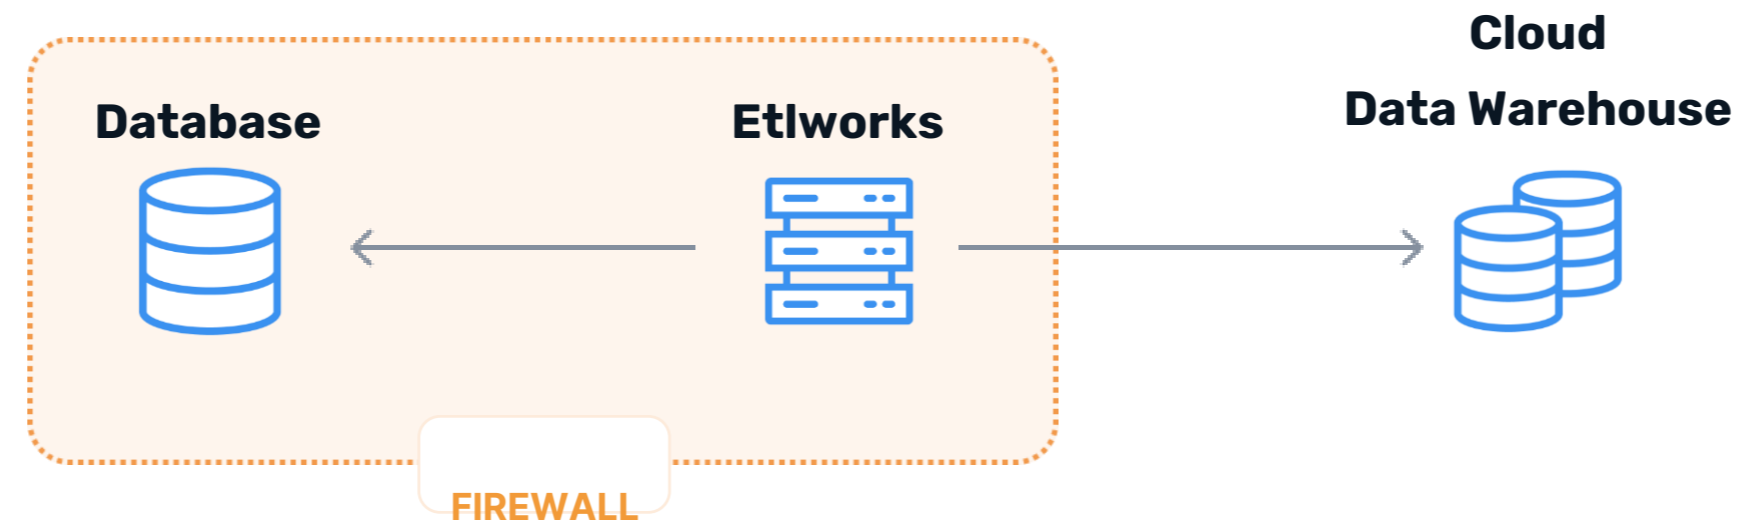

- AWS
- Azure
- Google Cloud
- IBM Cloud
- Oracle Cloud
- Any cloud region, including GovCloud
- Hybrid cloud (cloud + on-premise)

[? ETLWORKS ON-PREMISE](#)

Cloud with Optional SSH Tunnel

On-Premise

Hybrid-Cloud with Integration Agents

Integrations and Ecosystem

Out of the box, Etlworks supports most relational and NoSQL databases, practically any HTTP-based API, most file storage systems and industry-standard data exchange formats.

 [MORE ABOUT INTEGRATIONS](#)

Built-in APIs

- Manage ETL Artifact
- Execute Flows
- Monitor Flows
- Monitor Health

User-defined APIs

- Pull (/get) – get data from custom endpoint
- Push (/post) – send payload to custom endpoint
- CRUD (/post, /put, /delete, /patch)
- Upload files to connections created in Etlworks

Webhooks

- All Etlworks events
- Web and Email
- Slack integration
- Teams integration

Scripting

- JavaScript & Python
- SQL
- Shell (Linux and Windows)
- XLST

Security

Authentication

- Strong passwords are enforced
- MFA
- SSO
- All major identity providers are supported

Audit and logging

- System wide audit-trail
- Per flow execution logs
- System logs
- Logging API
- Webhooks for all system events

User management

- User enrollment workflow (access by invite)
- Built-in multitenancy
- Roles (admin, editor, operator, viewer, API)

Compliance

- SOC 2 type II and SOC 3
- GDPR and DPA
- HIPPA

Encryption

- Encryption in transit (SSL)
- Encryption at rest (PGP)
- Strong encryption of the credentials

Data protection

- Automatic daily backups to encrypted storage
- Time to restore from backup - minutes
- Customer data is not stored in Etlworks servers

[MORE ABOUT SECURITY](#)

Architecture and Components

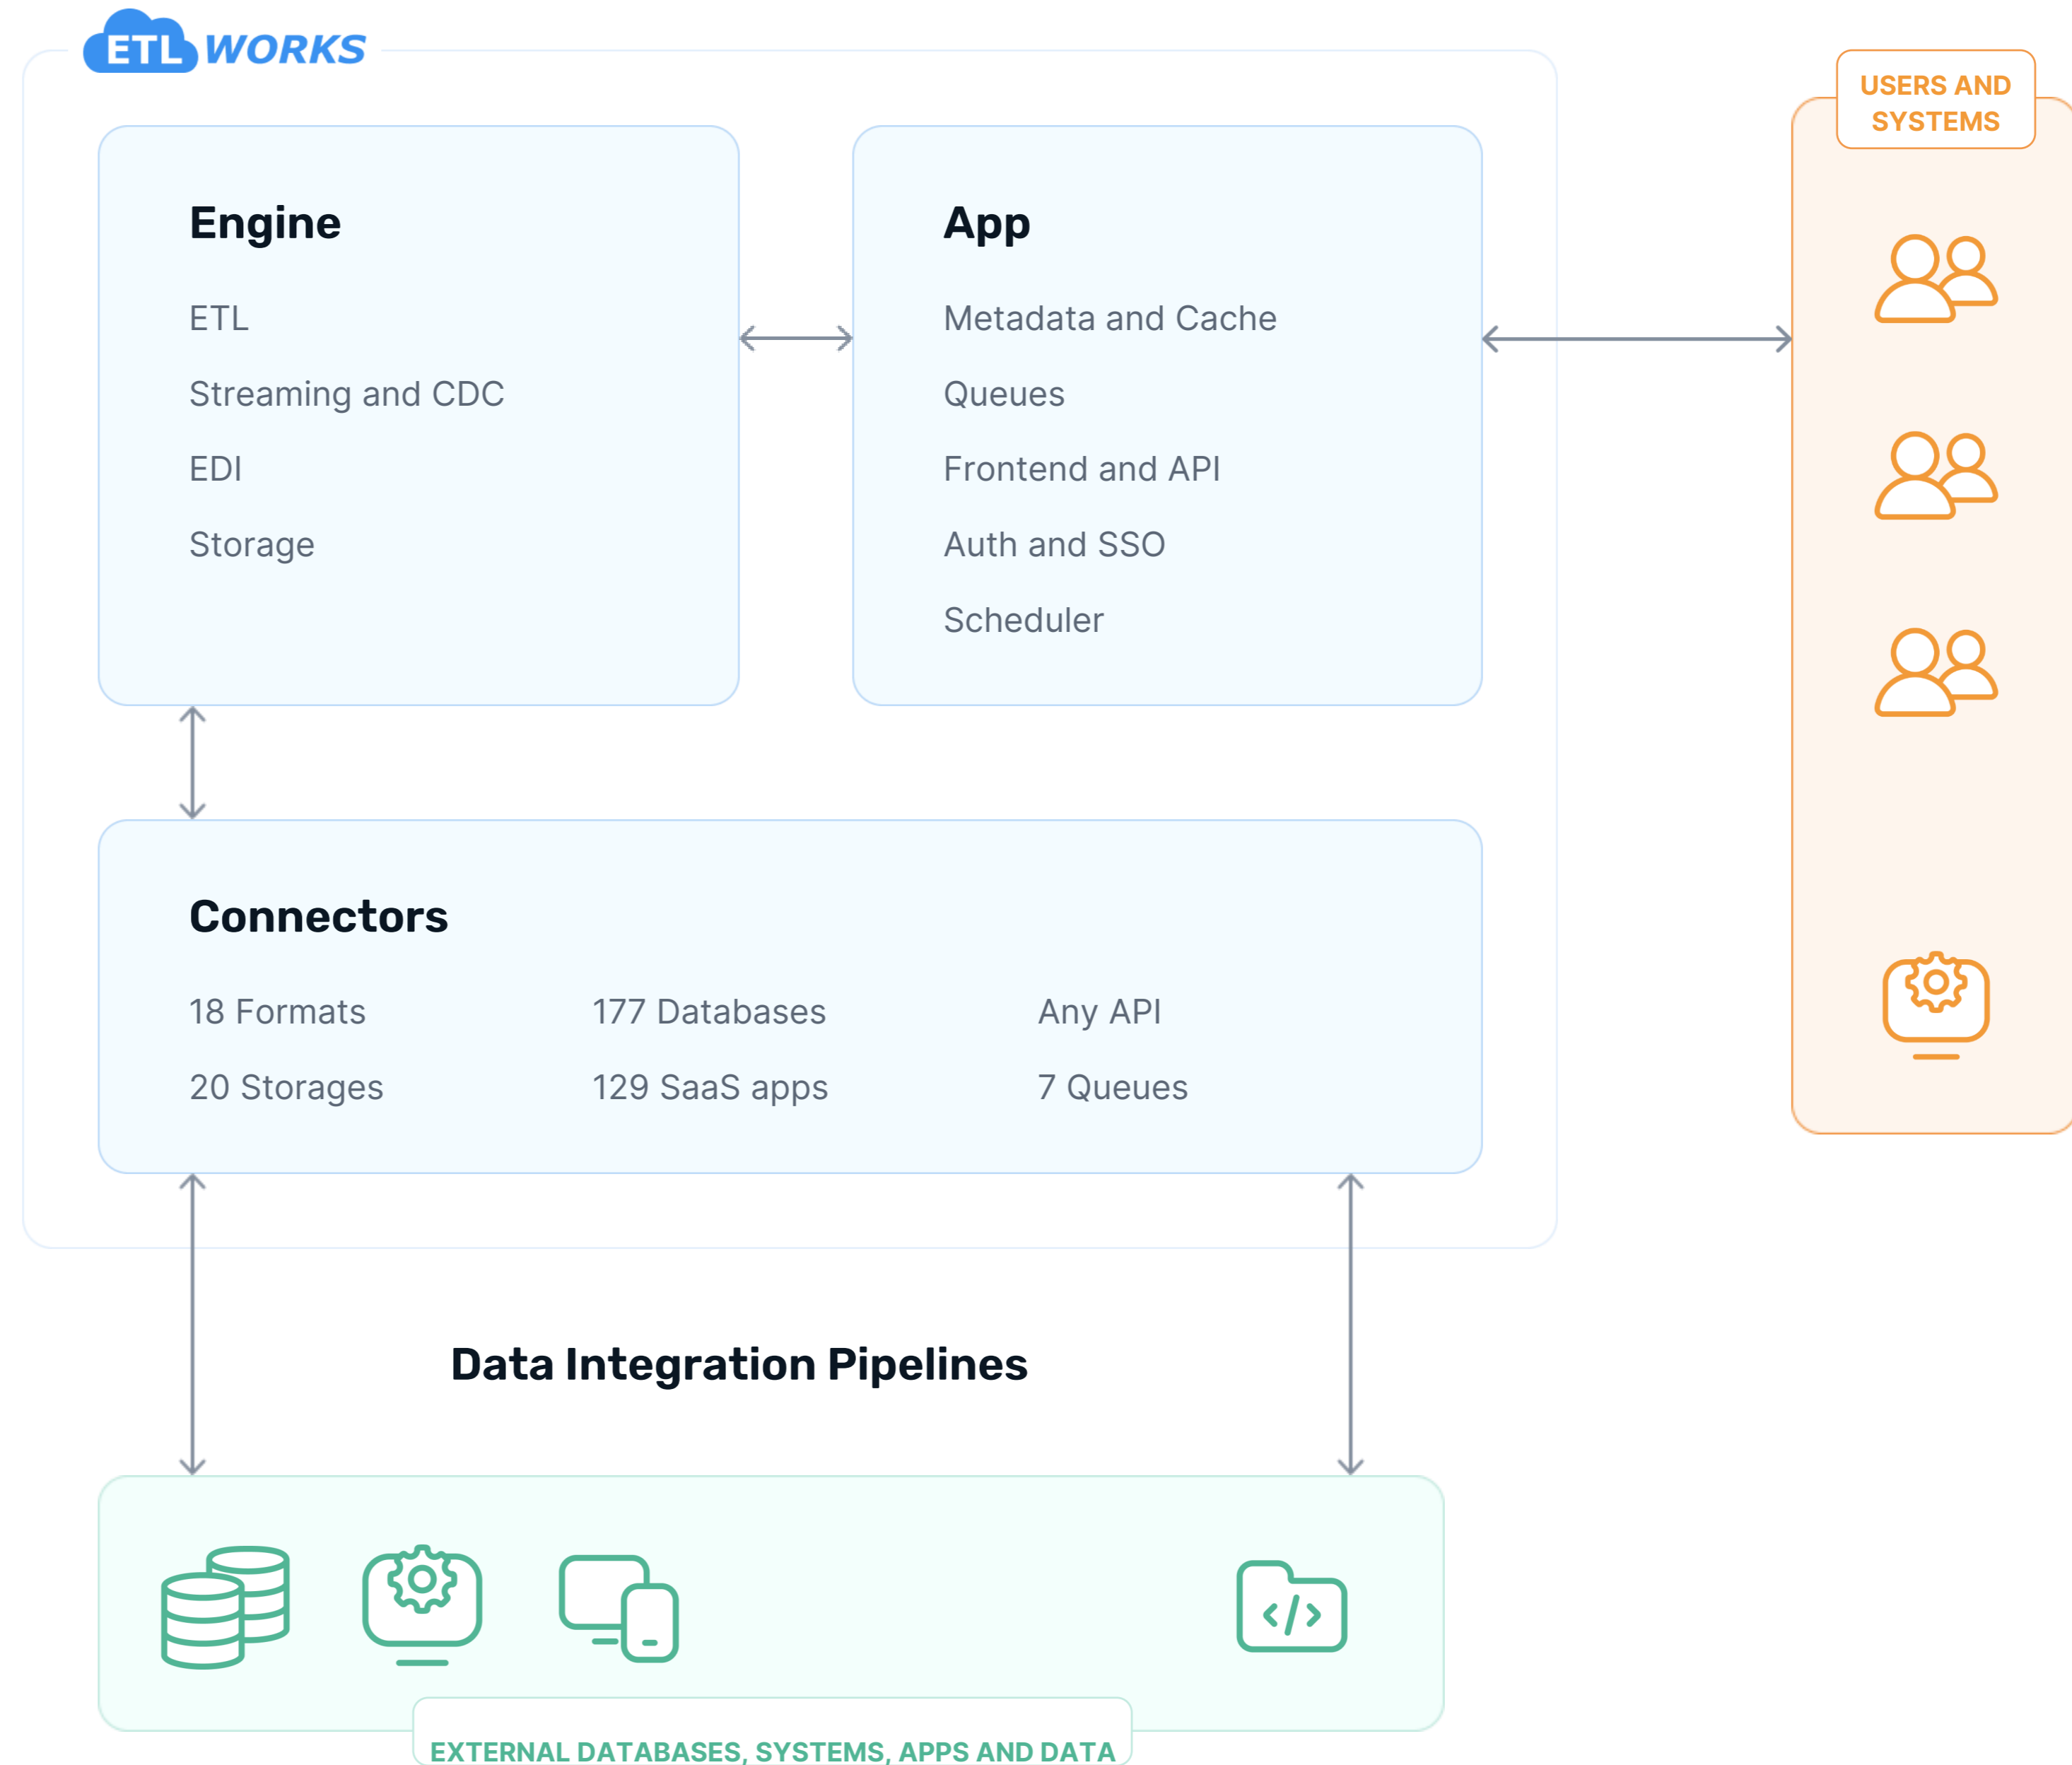

Technology stack

- Backend - Java
- Frontend – JavaScript (EmberJS), HTML, CSS
- Database - PostgreSQL
- Cache and configuration – Redis
- App server – Tomcat

Scalability

- Vertically and horizontally scalable
- Single node deployment
- Multi-node deployment (symmetrical cluster)
- Autoscaling using cloud infrastructure
- High data volume – billions of rows per day

 ETLWORKS ARCHITECTURE

Comparison with other Vendors

Etlworks is a modern, cloud-first, any-to-any data integration platform

Feature	Etlworks	Talend	MuleSoft	Stitch	Matillion	Informatica	Fivetran	HVR	Qlik
Any-to-Any ETL	✓	✓	✗	✓	✗	✓	✓	✗	✗
Multi-Cloud	✓	✓	✓	✓	✓	✓	✓	✗	✓
On-Premise	✓	✓	✓	✗	✗	✓	✗	✓	✗
Large Volume Performance	✓	✓	✓	✗	✓	✓	✓	✓	✓

Plans & Pricing

Etlworks offers self-managed subscriptions through our customer portal. We also offer invoice billing. All plans include standard support, unlimited connections, flows and users.

[\\$ ABOUT PRICING](#)

Starter

\$300 / MONTH

- ✓ Shared instance
- ✓ Best for processing up to 100K records a day,
- ✓ Unlimited users and connectors

[SIGN UP](#)

[Learn more](#)

Business

\$600 / MONTH

- ✓ Shared instance
- ✓ Best for processing up to 1M records a day,
- ✓ Unlimited users and connectors

[SIGN UP](#)

Services

Etlworks is a modern, cloud-first, any-to-any data integration platform that scales with the business

Our distributed team comprised of engineers, industry experts, and savvy entrepreneurs. We work hard to deliver easy-to-use data integration software that scales.

Support

- Standard support is included
- Extended support is available
- Custom SLA is available

Development

- Professional services
- Custom data integration development
- Trusted Partners

Consulting

- Best in class project management
- Highly trained engineers
- Short implementation cycle
